

AIGP

Artificial Intelligence Governance Professional

Live Online Training

Official IAPP Curriculum

Exam Preparation Included

Expert Australian Trainers

The **AIGP** is the world's leading certification for AI governance professionals, designed for those responsible for governing, managing, and overseeing AI systems within their organisation. Delivered by **Privacy 108** — an **IAPP Official Training Partner** — this course combines expert-led instruction with practical, applied learning to prepare you for exam success and real-world programme leadership.

COURSE OVERVIEW

Designed for professionals navigating the rapidly evolving world of AI, this course equips you to establish governance frameworks, navigate AI-specific laws and international standards, and govern AI systems across their full development and deployment life cycle, grounded in practical, real-world application.

WHAT YOU WILL LEARN

- Understand AI concepts, risks, and the principles of responsible AI governance
- Navigate AI-specific laws including the EU AI Act and global regulatory frameworks
- Apply industry standards such as NIST AI RMF and ISO 42001 to governance programmes
- Govern the full AI development life cycle – design, training, testing, and deployment
- Establish policies, risk assessments, and oversight mechanisms for AI systems
- Manage AI incidents, monitor deployed systems, and meet transparency obligations
- Evaluate and govern third-party and generative AI risks within your organisation

7 COURSE MODULES

01 Foundations of Artificial Intelligence

02 AI Impacts and Responsible Principles

03 AI Governance and Risk Management

04 AI Regulation

05 Other Laws that Apply to AI

06 Governing AI Development
